1   Literature and code

This is a example unit. We wil use two languages:

1. **Python**: Fast production, slow execution.

2. **Java**: Slow production, optimum portability.

1.1   Shakespeare code

ENGLISH

In this short example I will show some **english** code.

```python
msg = 'To be or not to be'
print(msg)
```

Isn't it *pretty*?

1.2   Cervantes code

SPANISH

Now, it's time for some **spanish** code.

```java
String msg = "En un lugar de La Mancha";
System.out.println(msg);
```

A KEY WORDS

Literature and code

english, 2   spanish, 2
